

Judith suffered from electric like pain that would shoot up her legs at night, and a horrible pinching pain in her fingers day and night. Judith's pain was so unbearable that it was keeping her up at night. Judith had been suffering from pain and discomfort for a long time, as she had previously had a lumbar fusion in her back. She had been to other chiropractors for this issue before, but had not received the results she was looking for.

Then Judith met Dr. Perkins at a health fair and her life was changed! She was impressed with Dr. Perkin's knowledge and genuine concern for her condition, and she loved the friendly and caring staff at Dynamic Life. After two weeks of treatment, Judith's electric pain has stopped and she can now sleep through the night! She is so grateful to Dr. Perkins for helping her, that she tells everyone to go check out his office! Judith regularly helps spread the word about how Upper Cervical chiropractic can help with innumerable problems!
